Expt. No. 46

Page No.

Estimation of iron Content of the given solution using potentiometer

| Volume of $K_2Cr_2O_7$ | EMF   | $\Delta E$ | $\Delta V$ | $\Delta E/\Delta V$ |
|------------------------|-------|------------|------------|---------------------|
| 0                      | 0.407 | 0.011      | 1          | 0.011               |
| 1                      | 0.418 | 0.013      | 1          | 0.013               |
| 2                      | 0.431 | 0.020      | 1          | 0.020               |
| 3                      | 0.451 | 0.048      | 1          | 0.048               |
| 4                      | 0.499 | 0.179      | 1          | 0.179               |
| 5                      | 0.678 | 0.021      | 1          | 0.021               |
| 6                      | 0.699 | 0.011      | 1          | 0.011               |
| 7                      | 0.710 | 0.008      | 1          | 0.008               |
| 8                      | 0.718 | 0.006      | 1          | 0.006               |
| 9                      | 0.724 | 0.004      | 1          | 0.004               |
| 10                     | 0.730 | 0.002      | 1          | 0.002               |
| 11                     | 0.731 | 0.002      | 1          | 0.002               |
| 12                     | 0.735 | 0.001      | 1          | 0.001               |
